

KCC
GROUP

The access control & automation specialists

We offer cost-effective, supply-only or supply & fit solutions on a wide range of automation and access control systems for mechanical-electrical and building contractors.

ORTALP

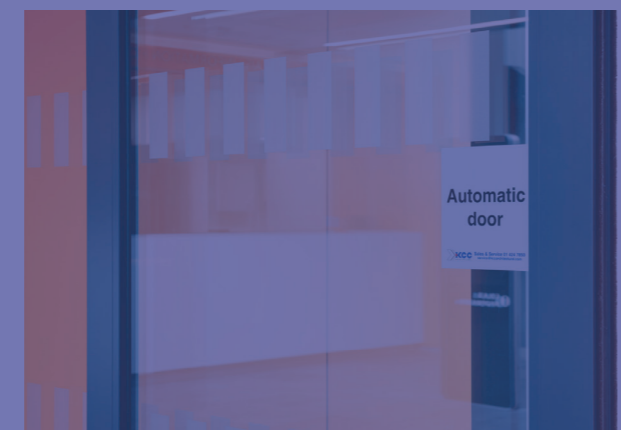

ORTALP

Did you know that KCC Group is a leading supplier and installer of access control and automation systems in Ireland?

We work with leading brands and manufacturers of access control, electronic locking systems and automatic door systems to deliver competitive access and automation solutions that work for clients and customers across all industries. We offer competitive, cost-effective supply-only and supply & fit solutions to mechanical-electrical and building contractors on projects across all sectors.

Talk to us about your requirements for supply or installation of:

- Access Control Systems
- Electric Locking systems / Maglocks
- Automatic Operators for all types of interior and exterior doors
- Window Actuators
- Automatic Turnstile systems

We'll look after your automation and access supply and installation requirements.

Our range of automatic doors and operators, our access control systems and our electronic locking systems allow us to offer a tried and tested, barrier-free access solution both into and around buildings.

Whether external or internal we can offer automatic operators to retrofit to existing doors, upgrading them to automatic doors or we can provide complete new installations including doors both swinging and sliding where the application calls for it.

Key Features

- Our systems can integrate into the fire alarm and security systems to ensure a functional, safe and secure system for your clients .
- We can also provide accessories such as contactless activation and card readers to complete any installation.
- Ongoing support available through our service and maintenance department.
- Team of qualified engineers & installation experts operating nationwide and all of our automatic products and installations conform to the relevant standards including EN 16005.

**Our purpose is to help
make buildings work**

Why Us?

The knowledge and the products to support your innovation.

Access 30 years of expertise and a comprehensive range of product, including multiple high-specification, unique product ranges.

The expertise and technology to provide a complete specification, drawing and compliant solution.

Every detail, every document, fully managed, for every opening. Helping to deliver the optimal solution, making your job easier and keeping everyone on the same page.

The scale to deliver and support quality, best-fit, large scale solutions, at very competitive prices.

Our own 2,000 square metre manufacturing facility in Dublin and our own expert installation team.

The capability and commitment to deliver on time, install without hassle and ensure everything works exactly as intended.

A dedicated, highly trained and expert team, ready to deliver.

The team to ensure all stays working as intended.

We install, service, repair and maintain all types of automatic and manual door solutions, including industrial doors, fire doors, roller doors, security locks, partitions, sliders and entrances. With 24-hour call out, 365-days of the year.

Project Reference

St Mary's Primary Care Centre, Cork

Comprehensive solution for primary care centre

The brief was to provide a well-designed, robust and long-lasting solution that would not only withstand the typical high level of usage within a healthcare environment but would also enhance the overall aesthetic of the building. We produced a comprehensive specification for steel fire glazing and doors, automatic entrance doors, movable walls, door hardware and electric locking for this project. We also provided a smoke evacuating window automation system for the project under a contract with Walsh windows, who were the Façade contractor for the project.

- ✓ Access control
- ✓ Architectural hardware
- ✓ Door automation
- ✓ Electronic locking system
- ✓ Glazed fire screens & doors
- ✓ Movable walls
- ✓ Window actuators & controls
