

Did you know that KCC do Hospitality Locking Systems

All kinds of rooms, all kinds of access.

KCC are the market leader in Ireland in the supply, installation and maintenance of **hospitality locking systems**, for **hotels, guesthouses, student accommodation facilities** and the **build-to-rent sector**. For over 20 years, we have helped hospitality providers satisfy guests and residents' needs by ensuring that they have a safe, secure and reliable locking system.

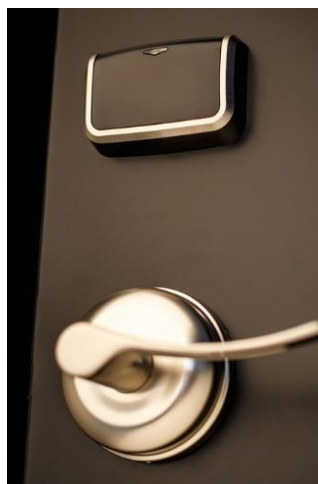

We cater for every scenario from 5-10 bed guesthouses to hotel groups with thousands of rooms to large scale apartment blocks and provide simple stand-alone systems as well as fully integrated online systems which can work with both booking software and BMS to make your guests and residents experience as seamless as possible.

Service & Maintenance

KCC also provide peace of mind to all our customers through a countrywide support network with technical expertise and on call engineers available to deal with any issues that may arise with your locking system 24 hours a day, 365 days a year.

Upgrades

Our locking systems offer a straightforward upgrade process that doesn't require any new door cuts or repainting when replacing existing locks. There are 3 different upgrade options available allowing you to transform your existing locks into smart, cloud connected devices at your own pace.

Enhanced security & user experience

Advanced credential security

Our locks feature advanced credential security, with the added option to use MIFARE Plus technology, which provides enhanced security for RFID cards.

Optional DirectKey™ Technology

Optional **DirectKey™** technology, which allows guests to securely download their assigned key via a hotel-provided smartphone app. This feature enables easy access to their assigned room and other access-controlled areas.

Customisable to fit your needs

A range of lever styles and finishes available to suit any aesthetic and fit your look.
