

**Solutions for Interior
& Fit-Out projects**

Our purpose is to help make buildings work

Why Us?

The knowledge and the products to support your innovation.

Access 30 years of expertise and a comprehensive range of product, including multiple high-specification, unique product ranges.

The expertise and technology to provide a complete specification, drawing and compliant solution.

Every detail, every document, fully managed, for every opening. Helping to deliver the optimal solution, making your job easier and keeping everyone on the same page.

The scale to deliver and support quality, best-fit, large scale solutions, at very competitive prices.

Our own 2,000 square metre manufacturing facility in Dublin and our own expert installation team.

The capability and commitment to deliver on time, install without hassle and ensure everything works exactly as intended.

A dedicated, highly trained and expert team, ready to deliver.

The team to ensure all stays working as intended.

We install, service, repair and maintain all types of automatic and manual door solutions, including industrial doors, fire doors, roller doors, security locks, partitions, sliders and entrances. With 24-hour call out, 365-days of the year.

Fit-Outs & Interiors

Wall & Partitioning Systems

Glazed walls & partitions

We work with leading brands of glazed walls and partitions to deliver solutions that work for your specific project requirements, dividing spaces through the design and manufacture of internal glazed partitions with integrated doorsets.

We are the official partner of Komfort Partitioning Systems in Ireland, allowing us to offer you an impressive and reputable portfolio of glazed wall and partitioning solutions that will contribute to the overall quality, functionality and aesthetics of the spaces you design. This independently certified product range includes glass office partitions as well as solid partitioning, office pods & booths to suit a wide range of client requirements.

Superior Performance

Some of the key benefits of our wall & partitioning systems include

- Design flexibility
- Aesthetics & customisation
- Market-leading acoustic insulation
- Sustainable solutions
- Ease of installation & adaptability
- Integration with technology
- Compliance & safety
- Support & expertise from design & specification through to installation and aftercare

Movable walls

Movable walls and partitions allow for a better, more flexible use of space within a building.

Our movable walls solutions will satisfy even the most stringent user requirements. Our most popular options offer excellent acoustical properties and insulation values, ideal for creating multiple private rooms within one large ward for example.

The system runs smoothly along a track by means of ball-bearing trolleys, making it very easy for staff and maintenance officers to operate. The systems have been designed to eliminate the need for floor guides. They are made up from various different panels which can be finished in a variety of different styles.

Due to a metal self-supporting frame, a height of more than 15 metres can easily be reached, allowing you to design a wall that meets your requirements entirely, both technically and aesthetically.

Our walls can meet the highest fire safety requirements. We work with Parthos who are one of the few manufacturers in Europe who have developed a wall able to withstand flames for longer than 60 minutes. We also supply walls with a fire resistance rating of 30 minutes and fire retarding walls.

Fit-Outs & Interiors

Specialist Steel Glazing

Combining aesthetics and functionality to create beautiful spaces

We are the chosen provider of internationally-renowned brands of high quality glazing systems including Schuco and MHB so that we can provide our clients with a glazing solution for their project that not only offers superb functionality, but also perfectly compliments their design intent with superior aesthetics.

Our glazing consultants will advise you on the best glazing solution for your project based on your budget, the purpose and location of the glazing and other requirements such as fire-rating, dB rating, UV protection, product capabilities, overall project aesthetic or frame options, for example.

Fit-Outs & Interiors

Fire Protection Systems

Fire rated glazing

Containing and controlling the spread of fire is crucial to providing building users and occupants with a safe and effective passage to escape. Glazed fire screens and doors help to contain the spread of fire, improve visibility, and allow for the flow of natural light through a building.

Our glazed fire screens and doors are available with integrity-only (E) or integrity & insulation (EI) fire protection ratings, depending on your specific requirements. We offer height capabilities of up to 3 metres, slim profiles, maximum glazed elements, integrated hardware and access control and manual or automatic operation, depending on the intended use. We also provide both fire and non-fire rated internal and external curtain walling systems and viewing panels.

Choosing the right solution for your building

The choice of system is determined by several factors including your fire resistance requirements, e.g. 30, 60, 90, or 120-minute fire protection, sound insulation requirements, door functionality, e.g. push/pull vs. mechanical “lever” function, budget, aesthetics, location within your building, intended frequency of use and compliance with building regulations and BS EN1634-1 / BS476 Part 22.

Fire & Smoke Curtains

Fire and smoke curtains are critical safety features in buildings, serving as passive fire protection systems that help contain the spread of fire and smoke. In the event of a fire, these curtains act as barriers, compartmentalizing the affected area to prevent the fire from spreading rapidly throughout the building. By containing the fire to a specific zone or area, the curtains help limit property damage and potential harm to individuals within the building.

Smoke inhalation is a significant threat during a fire, often causing more casualties than the fire itself. Fire and smoke curtains assist in controlling and limiting the spread of smoke, allowing occupants more time to evacuate safely and minimizing smoke-related injuries.

We work with leading manufacturer of Fire and Smoke curtains, Stoebich, who are recognised for their efficacy as passive fire protection systems in buildings. Stoebich fire curtains offer a comprehensive passive fire protection solution, combining rapid deployment, effective fire and smoke containment, design flexibility, compliance with standards, durability, and integration capabilities. Integrating these curtains into building plans significantly enhances the safety of occupants and assets during a fire emergency.

Riser door systems

A necessity in most buildings, traditional riser doors often create an unwelcome eyesore in public areas. KCC riser door systems are elegant, frameless riser doors which allow you to create a flush seamless finish. The high performance folded steel frames with an integral perforated plasterbead allow the plaster or tape and jointing compound to be applied up to the edge concealing the door frame and all fixings. Extensive testing has been carried out to cover for all fire and acoustic needs. As such, this range of concealed riser doors is the most extensive and versatile range on the market to date.

Key features

- Aesthetically clean and discreet
- Concealed frame
- Concealed hinge
- Remarkably quick and simple to install
- Fire tested up to 2 hours
- Acoustically and air leakage tested
- Textured or primed finish to allow same finish as walls

Fit-Outs & Interiors

Ironmongery & Door Hardware

Architectural hardware

Our team will be able to advise you on the best hardware solution to suit your needs in terms of usage, aesthetics and function.

Our range includes door levers, pull handles, signage, door closers, hinges, locks, cylinders and master key locking systems, in different materials and finishes, depending on your requirements.

All of our hardware is fully compliant with industry standards and we provide all of the appropriate performance, fire test evidence and certification for your peace of mind.

Fit-Outs & Interiors

Access Control Systems

Access that meets the needs of the modern user

Enhanced security

With the requirement to meet the wide scope of access and security in the commercial sector, we supply, install and support everything from simple mechanical digital locks to fully networked access management systems to suit everything from a single door to thousands of doors.

System integration

Our access control products can interface with BMS (Building Management Systems) and fire safety equipment and other elements such as automation, barrier systems and lifts. Once installed we provide 24/7 support through our network of service centres.

Solutions include

- RFID - Smart contactless access solutions
- Bluetooth capabilities
- Stand alone or network-based solutions
- Electronic locks & cylinders
- Electronic strike & magnetic door locks
- Bio-metric / recognition
- BS EN1125 compliant electronic panic locking systems
- Touch-free sensor activation units
- Turnstiles & Speedlanes

Fit-Outs & Interiors

Automatic Door Systems

Door automation for ease of movement throughout your building

We work with our clients to design an automation strategy tailored to the requirements of the building and its visitors or occupants.

Popular solutions include

- Revolving doors
- Swing doors
- Sliding doors
- Folding doors

We also facilitate requirements for disabled or specialist access through an automated system such as a push-pad or sensor, or hands-free, contactless automation for areas such as bathrooms or canteens to maximise hygiene control.

Scale & team to deliver

We have a team of skilled engineers and installation experts operating nationwide to ensure your automated doors are installed and maintained in line with European Standard BS EN16005.
